

Phase One FlexAdaptor for 4" x 5" cameras

Capture all types of images on your 4" x 5" camera

Captures all types of subjects in all types of light via the renowned Phase One single shot technology. You will benefit from digital captures that surpass the quality of film.

Generate large files

Allows stitching of two or three image captures in order to generate panoramic images at resolutions up to no less than 89 MB depending on the single shot camera system in use.

Support for a broad range of 4" x 5" cameras

Enables easy mounting of any Phase One single shot camera back on 4" x 5" view cameras from Sinar, Horseman, Cambo, Linhof, Toyo, and Arca Swiss. Interchangeable inserts provide support for all LightPhase models as well as Phase One H 20 with the same adaptor.

No change in focus

Comes with a specially made focusing screen that matches the focal plane of the 4" x 5" view camera and with masks that indicate the 1-2-3 shot areas.

Full support for your 4" x 5" camera

Benefits from the functionality of the view camera in terms of image area, supported lenses, for instance wide-angle lenses, as well as tilt, swing, and shift functions.

Phase One FlexAdaptor

The flexible solution for digital capture on your 4" x 5" camera

Phase One FlexAdaptor

The flexible solution for digital capture on your 4" x 5" camera

Phase One®'s FlexAdaptor™ is a versatile sliding adaptor that allows Phase One's single shot direct digital imaging systems, the LightPhase® and Phase One H 20, to be mounted on various 4" x 5" view cameras from Sinar, Horseman, Cambo, Linhof, Toyo, and Arca Swiss.

Once mounted, you can choose to shoot only once like you normally would with the LightPhase or Phase One H 20. Or you can choose to take two or three overlapping shots and stitch them together by software. The final result is a high resolution, panoramic image.

The FlexAdaptor supports the following single shot systems: LightPhase for Hasselblad, LightPhase for Mamiya 645AF, LightPhase for CONTAX 645, and Phase One H 20.

The FlexAdaptor may be used with all LightPhase and H 20 models. Simply replace the interchangeable inserts.

FlexAdaptor with LightPhase

3 x 18 MB / 3000 x 2000 pixels

49 MB / 3000 x 5300 pixels

2 x 18 MB / 3000 x 2000 pixels

33 MB / 3000 x 3600 pixels

FlexAdaptor with Phase One H 20

2 x 48 MB / 4000 x 4000 pixels

89 MB / 4000 x 7800 pixels
